

National Newborn Screening Status Report

Updated 08/02/10

The U.S. National Screening Status Report lists the status of newborn screening in the United States.

Dot "●" indicates that screening for the condition is universally required by Law or Rule and fully implemented

A = universally offered but not yet required, **B** = offered to select populations, or by request, **C** = testing required but not yet implemented

D = likely to be detected (and reported) as a by-product of MRM screening (MS/MS) targeted by Law or Rule
