

Bradford Therrell, Jr., Ph.D. is the director of the National Newborn Screening and Genetics Resource Center (NNSGRC) and a professor in the Department of Pediatrics at the University of Texas Health Science Center at San Antonio. Prior to assuming the directorship of the NNSGRC, Dr. Therrell worked for over 28 years for the Texas Department of Health Bureau of Laboratories. There he was director of the Chemical Services Division, with management responsibilities for newborn screening and other biochemical screening programs.

Dr. Therrell earned a bachelor's degree in chemistry from Mississippi College, and master's and doctorate degrees in inorganic chemistry from Florida State University. In 1997, he was granted an honorary M.D. by Kunming Medical College, in Kunming, China, for his outstanding contributions to improving pediatric health outcomes through newborn screening. He is the 2000 recipient of the Bob Guthrie award of the International Society for Neonatal Screening for "worldwide recognition of outstanding contributions in newborn screening." Dr. Therrell has edited or co-edited four books and five book chapters, six monographs, and over 120 scientific articles in the areas of public health policy, computerization, automation, chemistry, microbiology, endocrinology, hematology, and newborn screening.
