# Genetics Literacy Project

## Literature and Materials Review

### Volume II: Research Bibliography

This bibliography is offered in support of the accompanying report "Genetics Literacy Project Literature and Materials Review: A Working Report." The bibliography was generated by EndNote (version 4.0), the reference software used in conjunction with the review. It contains all references that were collected during the literature and materials review, including but not limited to: books; peer reviewed journal articles; government reports; conference proceedings; online magazine articles; education program materials; and, popular news media. This bibliography is currently under discovery, intended to evolve as feedback to the accompanying report is received and as the research process moves forward. It serves primarily as a starting point for future inquiry into the issues surrounding genetics literacy.

Produced by LTG Associates, Inc., in support of efforts to improve genetics literacy under a Cooperative Agreement between the Genetic Services Branch, Division for Children with Special Health Care Needs, Maternal and Child Health Bureau, Health Resources and Services Administration, and the National March of Dimes Birth Defects Foundation.
