

Acknowledgments

The September 2001 revision of the GPC curriculum could not have occurred without the help, guidance, and support of a tremendous number of people. We acknowledge some of the key contributors here and include a full listing of the GPC members at the back of this curriculum. Each person who has participated in this the GPC over the past three years has impacted the form the curriculum has taken in this revised stage.

The GPC Federal Project officer from the Maternal and Child Health Bureau of the Health Resources and Services Administration, Michele Puryear, and GPC Bureau of Health Professions, HRSA, representative, Ruth Kahn, have provided invaluable guidance throughout the project. The Project Director, Norman Kahn, and Project Codirectors, Eugene Rich, and Modena Wilson, have demonstrated gracefully what can be accomplished through interdisciplinary leadership and diligence. The Project Manager, Ardis Davis and Project Administrator, Roger Sherwood, have played critical roles in facilitating communication, logistics and the curriculum development process.

Grateful acknowledgement is extended to the Maternal and Child Health Bureau and Bureau of Health Professions, Health Resources and Services Administration, the sponsor of the GPC, and to the co-funders of the GPC, the National Human Genome Research Institute, National Institutes of Health, and the Agency for Healthcare Research and Quality. Additionally, the contributions by the contractor, the Society of Teachers of Family Medicine, to the achievements of the GPC which have led to this curriculum revision, are to be acknowledged.

Early meetings of the GPC Advisory Committee and the GPC Education Consultant Committee shaped the educational strategies we used within this curriculum. Contributing specifically to developing the approach were: Louise Acheson, Roberta Pagon, and Preston Reynolds. The September 2001 revision benefited from the piloting done by the GPC faculty teams. In addition, particularly strong reviews made the revisions go quickly. Our special thanks go to these reviewers: Mary Lee, Reed Pyeritz, John Fogarty, Jim Evans, Jamie Frias, Modena Wilson, Priscilla Short, Gene Rich, Bernie Siegel, Karen Edwards, Rodney Howell, Marilyn Dumont-Driscoll, and Anna Mastroianni.

Even with the terrific teamwork and contributions from these GPC members, we take responsibility for the content that remains. We look forward to learning more from this next phase of piloting the curriculum.

With regards,

Editors, GPC Curriculum September 2001 Revision
