

Newborn Screening Programs in the U.S.

Newborn screening programs exist in all 50 states and the District of Columbia. Each of these 51 programs has identified an individual contact person most knowledgeable about program and followup issues and a second individual whose responsibility is laboratory protocol. There are a number of state programs with either contract laboratories or multiple laboratory sites. In these states, the contact person listed remains the individual deemed most appropriate to address the laboratory issues for the state program. A few states prefer followup issues and laboratory issues to be handled by the same individual and those are so noted.

This listing is intended to be updated as needed and, therefore, individuals detecting errors and requesting changes are asked to write or fax Dr. Brad Therrell, 1912 W. Anderson Lane #210, Austin, TX 78757 (FAX 512-454-6509).
